How does this software improve the efficiency with which a practice operates?	IMS for Therapy—Fully Certified Physical Therapy Practice Management and Documentation Software is engineered to be a powerful and robust complete Therapy Software Solution for the marketplace. The company notes that many therapists across the country are doing data conversions to IMS for Therapy.	The fully integrated RevFlow web-based practice management system is designed by therapists for therapists. From patient records and scheduling to billing management, this system is designed to help every facet of a practice run smoothly. Company strives to provide practices with guidance and training to help owners achieve their business goals.	The company reports that many practices that use Clinicient generally experience a 10% to 15% increase in revenue by filling therapists' schedules, ensuring therapists are paid the maximum amount for every visit, and decreasing the cost to collect significantly.	TheraOffice enables clients to organize and optimize patient traffic, prove medical necessity with efficient documentation, and increase financial success through improved revenue cycle management. Now includes the G codes that adhere to the new Medicare Functional Reporting requirements.	MWTherapy is designed to serve as an economic, web-based software: flexible scheduling, customizable EMR with compliance alerts and supporting PQRS and Functional Limitation Reporting, built-in billing, and reporting. MWTherapy is secure and HIPAA compliant.
