What differentiates your software from the competition?	Cypress is robust and feature-rich but easy to learn and use.	The people behind it, depth of rehab knowledge, 15-plus years of experience.	Strong documentation and exceptional customer service, proven by consistent customer accolades. Customers commend our user-friendly software because it streamlines data management and optimizes productivity, and they say that, in comparison to other software products, Rehab Optima requires the least amount of time to perform specific functions.	Hands On Technology Inc staff specializes in helping clinics that lack experience in EMR or electronic billing. We offer custom-designed documentation templates to suit the specific needs of any therapy provider. TheraOffice is an all-in-one clinic management suite with full integration between the scheduling, documentation, and billing components.

Improve Your Workflow with Spot-On Business Software.

InTouch is an all-in-one, fully integrated practice management tool encompassing all aspects of operating a rehab practice. What makes us shine? We are the easiest-to-use software that will actually help you better manage and grow your operation. For therapists on-the-go, see our new Timesheet module with productivity reporting! All for one low monthly fee.	Designed for PT/OT/ST, installed, and Web versions.	PTOS Software is the one used by most physical therapy practices in the United States with users in all 50 states. PTOS has one of the largest development and support teams in the rehab industry. Users can easily find clinics already familiar with the PTOS plus seminars and training are available in major US cities.	Raintree Systems offers an all-in-one system (not integrated components) with real-time response that enables multi-site practices to connect their locations without the need of expensive third-party networking software, such as Citrix or Microsoft Terminal Services.	We focus on results, and not software. We help our prospective clients define and measure their current status and their goals for their true motives for leaving paper and going to electronic documentation. We then provide the tools and, where appropriate, the services, to help re-engineer workflows and processes to optimize the client's goals.
