How does this software help therapists run a more efficient practice?		An intuitive interface offers an easy-to-use design and built-in training to optimize organizational productivity. Improve therapist efficiency, simplify clinical documentation, and save money with real-time reporting, appointment scheduling, enforced regulatory compliance, electronic data interchange, and outcomes measurement.	Designed to help therapists run a more efficient practice by enabling staff teamwork, streamlining all practice activities, improving billing performance, accelerating visit documentation, and allowing the PT to focus on patient relationships and generating more patient referrals.	As therapists sign-off on patient visits, charges are automatically captured and coded based on the treatment and the patient's insurance billing rules, and instantly pushed into billing system for immediate claim scrubbing and electronic submission. Robust reporting for tracking A/R, therapist productivity, patient responsibility, expected vs actual payments, month-end closing.	ClinicSource Therapy Practice Management Software is engineered to manage all aspects of the clinic including scheduling, electronic billing, clinical documentation, and electronic charting. Documentation templates include evaluations, care plans, and SOAP notes as well as a pre-populated goal library. ClinicSource is 100% Web based and mobile device ready.	TheraOffice, by Hands on Technology Inc, Westmont, Ill, is offered as a fully integrated EMR and practice management solution for the rehabilitation industry. It can run on a clinic's server or on ours. TheraOffice enables clients to organize and optimize patient traffic, prove medical necessity with efficient documentation, and increase financial success through improved revenue cycle management.
